## WORK EXPERIENCE

---

### AV & Video Support

Colorado Christian University

Oct 2023 – May 2024

- Manage setup and operation of audiovisual equipment for school events, including microphones, presentations, and live streams.
- Provide sound support for chapel services and large school events, ensuring optimal audio quality.
- Troubleshoot technical issues during events to ensure a seamless experience for presenters and attendees.

### Golf Player Services

Lakewood Country Club

May 2022 – May 2024

- Manage tee time bookings and ensure efficiency of players on the course
- Maintain accurate record of players' scores and assist with scorekeeping during tournaments
- Coordinate with other departments, such as maintenance and food and beverage, to ensure a high quality player experience.

### Project Manager/Data Analyst

The Dayton Company

Jan 2021 – Dec 2021

- Oversaw and managed budgeting project for The Dayton Company with the goal of streamlining and improving budgeting process.
- Collected and organized thousands of forms of expenses into one centralized place.
- Wrote and implemented SQL code to make the process more efficient and cost effective.

### Behavioral Health Technician

Horizon Recovery

May 2024 – Current

- Facilitated therapeutic group sessions, guiding clients in developing effective coping strategies.
- Monitored, documented, and reported on client behaviors and progress consistently.
- Collaborated with a multidisciplinary team to implement and adjust individualized treatment plans.

## HIGHLIGHTED PROJECTS

---

### [MelodiQ \(Spotify Stats & Recommendations\)](#)

Jan 2022

- Developed a web application that allows users to log in with their Spotify account and receive music recommendations based on their preferences. The app also displays the user's top artists and songs over different time frames. JavaScript for the logic and interactivity of the app, HTML, CSS.  
Spotify Test Account – Username: harbor17@icloud.com – Password: Spotifytest2112

### [Portfilify \(All-in-One Resume and Portfolio Web Application\)](#)

Sep 2021

- Created a front end version of a potential web application for college students and professionals to showcase their writings and work, similar to GitHub, but focused on resumes and portfolios. The app allows users to create repositories to track edits and history, ensuring a comprehensive display of their academic and professional accomplishments. Utilized HTML, CSS, JSX, and back-end technologies to develop the platform.
